

## Add domain record

Log in to your [Client Area for domains](#) and click on the domain you want to edit.

- Click on "**DNS Management**" in the left menu.
- Scroll down to the "**New Entry**" field.
- Select the desired record-type and click on "**Add**".
- Fill in the fields with the corresponding information and click on the blue button to save the DNS entry.

Please note that it may take some time for your new entry to become active.
